

Learning to play guitar for the first-time article.

Hello Louis Evans here! I have written this article to tell you my experience learning to play guitar and how you can achieve it!

So how did I get into playing guitar, well it started when I chose music as a subject for Thursdays between 11:30am to 12:40pm. Then the whole class got to know what music is and I was very interested in the guitar.

My uncle who is a very good guitarist played me a few songs on his acoustic which nearly made me cry with joy because it made me wanted to play guitar, but I didn't have enough motivation until Gabrielle told us that I could do it and achieve it!

I started from play figure notes which are colours like for example red is C and blue is D, then I moved on to proper chords and I have a few songs from my favourite band Crowded House which are weather with you and don't dream it's over.

The chords that are tricky for me which is bar chords, I will not give up and I will keep trying until I succeed.
