

The legend of Zelda breath of the wild video game review by kieran gladman

Introduction: Breath of the wild is my all time favourite game to play seeing as I,ve recorded up to 445 hours of gameplay you can pretty much tell I love this game ;)

From the story to the gameplay not to mention exploring the vast world breath of the wild is definitely a gaming journey to remember. It was developed and published by Nintendo and released on march 3rd 2017 it make a massive success worldwide and got the game award for game of the year.

This review will cover story, gameplay, characters, and my verdict on the game so join me my friends as we embark on a journey though the legend of zelda breath of the wild.

story: we begin our journey in the kingdom of Hyrule a stunning world filled with vast grasslands, scorching hot deserts,

freezing snowy mountains, lush jungles, sandy beaches a volcano mountain and an aquatic city.

100 years ago the kingdom was attacked by an entity known as calamity ganon the history of the royal family of Hyrule is also the history of calamity ganon that stretches back 10,000 years a highly advanced civilisation known as the Sheikah created a legion of guardians that were tasked to defend Hyrule as well as the four divine beasts vah Ruta, vah naboris, vah medoh and vah rudania who were piloted by four unique champions from each region of the kingdom as well the hylian with the sword that seals the darkness and the princess with the blood of a goddess they were ready to seal away calamity ganon but this was not the case 100 years ago. Every time ganon was defeated he reincarnated himself to avoid death but 100 years he had given up and assumed this primal form calamity ganon he appeared from deep beneath Hyrule castle and unleashed a massive blast of dark energy taking control of the guardians and divine beasts leading to the event known as the calamity.

You play as Link who awakens from a 100 sleep in a chamber called the shrine of resurrection after taking a tablet known as the Sheikah slate and exiting the cave you find yourself looking over the beautiful land of Hyrule and encounter an old man who turns out to be the king of Hyrule from 100 years ago he recalls you of the events that took place because after link wakes up he has no recollection of his memories but you find out the princess zelda is still alive and is trapped inside Hyrule castle stopping calamity ganon from breaking free to lay waste to the rest of hyrule. The king also informs you that he still has control over the guardians and divine beasts so you set out to recover your memories, take back control of the divine beasts, save princess zelda, destroy calamity ganon and restore peace to Hyrule.

gameplay: after you complete the tutorial the whole kingdom of hyrule is open for you to explore and that's the fun part of breath of the wild you can choose where to go and what you want to do you can clear enemy camps and take their weapons, hunt for food, create potions with monster parts and insects, tame a horse, activate sheikah towers to show a chunk of the map the possibilities are endless but the main thing to focus on is increasing your power to face ganon. Around Hyrule you can find shrines which are mini dungeons that grants you spirit orbs so you can increase your hearts or stamina wheel.

Link can climb any surface except for ceilings so you can scale high mountains if you have enough stamina using your sheikah slate is very helpful while exploring you have the remote bombs which are helpful in combat, magnesis which helps you lift metal

objects, stasis which can freeze objects and enemies so you can hit them to build up kinetic energy and send them flying, cryonis which can erect ice pillars from bodies of water so you can traverse across big rivers and fast moving streams and the camera which allows you to take pictures which you can store into the hyrule compendium a huge checklist of items such as weapons, enemies, treasure, materials and animals.

characters:

Link:

species: hylian/human

Link is the hero of Hyrule and has saved the kingdom countless times from evil he never backs down and faces every challenge with great courage and determination Link doesn't talk but everyone understands his emotions through his body language and facial expressions he is also princess Zelda's appointed knight.

princess Zelda:

species: Hylian/human

Zelda is the princess of Hyrule and takes everything in her stride her main duty is to awaken her sealing power that can destroy calamity ganon but she is more fascinated with the guardians and divine beasts this causes her to have a strained relationship with her father because of it and she resented Link as her appointed knight but eventually put her life on the line to save him Zelda hopes to take after her late mother and become a great ruler of Hyrule.

Verdict: this game is absolutely amazing and I give it 10/10
